

ri.uvt.ro Redesign

User Flows and Navigation Model

Role 2 — UX Researcher + Frontend Contributor

Audit date: 2026-05-04 | Week 2 / Phase 2 | Team Q-UW9

Purpose of This Document

This document defines the core user journeys for the redesigned ri.uvt.ro website. For each identified user type, it maps the current broken path on the existing site, identifies friction points, and proposes a clear ideal journey for the redesign. It also defines the navigation model and lists UX improvements to guide the implementation team.

Evidence base: This document draws directly from the site audit conducted on 2026-04-25, which identified 3 broken links on high-traffic pages, 2 duplicate Erasmus route trees, and a minimum of 5–7 clicks required before a user reaches actionable application information. All findings are cross-referenced against the UserTypes analysis and Proposed Solutions document produced by the team in Week 1.

1. User Flows

The following flows cover all identified user types. Each flow documents the current experience on ri.uvt.ro and proposes an improved journey for the redesign.

1.1 Erasmus Students

User Flow 1: Incoming Erasmus Student

Who they are

A foreign student nominated by their home university to study at UVT for one or two semesters under the Erasmus+ programme.

Their goal

Understand the full process of coming to UVT — from nomination to arrival — and complete all required steps successfully.

Entry point

Homepage → Erasmus section → Incoming Students

Current path (what happens today)

1. Land on homepage — Erasmus section is visible in the navbar.
2. Click Erasmus+ incoming students → `/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/`
3. Page has accordion sections: General Information, Erasmus+ Long-Term Study Mobilities, Erasmus+ Incoming Internship Mobilities — no guidance on where to start.
4. Click “Erasmus+ Long-Term Study Mobilities” → subpages listed: I was selected by my university. What now?, Academic Calendar, Accommodation, Erasmus+ Student Charter,

About ECTS Credits, ECTS Info Packs / Courses at UVT, Erasmus+ Departmental Coordinators.

5. Click “I was selected by my university. What now?” → page lists: Recommended Form, Academic Calendar, Online Learning Agreement, contact details, Courses at the West University of Timișoara.
6. Academic Calendar links to a PDF, not an HTML page.
7. No arrival or orientation information exists as a structured page.

Current pain points

- Key information is hidden inside accordion sections with no visible summary or guidance on where to start.
- Journey immediately drops into PDFs and an external application platform — requiring at least 5 clicks before reaching actionable information.
- No step-by-step structure connecting nomination → application → accommodation → arrival.
- Academic calendar is a PDF download, not a readable HTML page.
- No arrival or orientation section exists at all.
- Weak cross-linking between subpages — user must return to the navbar each time.
- Contact information is provided only as a mailto link with no form, no guidance on what to include, and no expected response time.

Proposed ideal path (redesign)

1. /erasmus/incoming-students/ — overview page with a visible step-by-step process.
2. Step 1: Check eligibility and confirm your university is a partner.
3. Step 2: Get nominated by your home university.
4. Step 3: Complete the online application.
5. Step 4: Find and arrange accommodation.
6. Step 5: Check the academic calendar as an HTML page.
7. Step 6: Read arrival and orientation information.
8. End: Student arrives prepared with all steps completed.

Missing steps / pages needed

- A structured eligibility and partnership check page.
- An arrival and orientation page with practical information.
- Academic calendar as an HTML page, not just a PDF.
- Sequential “Next Step” / “Continue to...” navigation at the bottom of each journey page.
- A contact and support section with a form, expected response time, and email guidance.
- External resources such as PDFs and third-party platforms should open in a new tab and clearly indicate when the user is leaving the site.

- A dedicated “Important Links and Documents” panel on the Incoming Students page, grouping all key resources in one visible place — including the Online Learning Agreement, ECTS Info Packs, Erasmus Student Charter, Departmental Coordinators list, and the Application Platform link — so users do not have to search through accordion sections or navigate to separate pages to find them.

User Flow 2: Outgoing UVT Student

Who they are

A UVT student who wants to apply for an Erasmus+ mobility to study or do a placement abroad at a partner university.

Their goal

Find available destinations, understand the application process, get selected, and complete all required paperwork before and after the mobility.

Entry point

Homepage → Erasmus section → Erasmus+ Mobility Programme

Current path (what happens today)

1. Land on homepage — Erasmus section is visible in the navbar.
2. Click Erasmus+ Mobility Programme → `/erasmus-mobility-programme/`
3. Page has accordion sections: For Students, For Academic and Administrative Staff, UVT Erasmus+ Partner Institutions, Erasmus+ Policy Statement — no guidance on where to start.
4. “For Students” accordion section contains no actionable next steps or clear call-to-action for applying.
5. “UVT Erasmus+ Partner Institutions” section has two links — Outside Europe and Inside Europe — both lead to map views instead of a structured HTML page.
6. “Erasmus+ Policy Statement” section contains a broken link — the Charter for Higher Education returns “resource not found.”
7. Available places links to an Excel or PDF file, not a filterable HTML page.

Current pain points

- The Erasmus+ mobility programme page uses accordion sections with no guidance on where a student should start.
- The “For Students” accordion section contains no actionable next steps or clear call-to-action for applying.
- Partner institutions are shown as a map view instead of a structured, filterable HTML list — making it hard to search by country, faculty, or available places.
- Available places link to an Excel or PDF file, not a searchable or filterable HTML page.
- The Erasmus+ Policy Statement section contains a broken link — the Charter for Higher Education returns “resource not found.”
- No clear end-to-end journey exists — there is no clear starting point for a student who wants to apply.
- No post-mobility guidance or checklist exists.

Proposed ideal path (redesign)

1. Homepage → clear “Outgoing Students” entry point visible without scrolling.
2. /erasmus/outgoing-students/ — dedicated page with a visible step-by-step process.
3. Step 1: Browse available destinations and places on a filterable HTML page, searchable by country and faculty.
4. Step 2: Check eligibility and application deadlines.
5. Step 3: Submit application.
6. Step 4: Receive selection result.
7. Step 5: Complete pre-mobility paperwork — Learning Agreement, ECTS forms.
8. Step 6: Arrange funding and grants.
9. Step 7: Complete post-mobility documents and credit recognition.
10. End: Mobility completed and credits successfully recognised.

Missing steps / pages needed

- No dedicated “Outgoing Students” page exists — add one under the Erasmus+ section at /erasmus/outgoing-students/.
- Available destinations as a filterable HTML page, searchable by country and faculty, not a file download.
- A dedicated “Important Links and Documents” panel grouping key resources — Learning Agreement, ECTS Forms, Erasmus Student Charter, Application Platform — in one visible place.
- A clear funding and grants page explaining financial support options.
- A post-mobility checklist page.
- Fix the broken Charter for Higher Education link in the Policy Statement section.
- Replace the map view for partner institutions with a structured, filterable HTML list.
- Clear separation between student mobility and staff mobility in the navigation.

1.2 International Students**User Flow 3: International Applicant — Non-EU****Who they are**

A student from outside the European Union seeking to apply for a full-degree programme at UVT.

Their goal

Understand the admission process, find the correct scholarship options, gather required documents, and successfully submit an application.

Entry point

Homepage → International Students → Non-EU Citizens

Current path (what happens today)

1. Land on homepage — International Students section visible in navbar.

2. Navigate to `/cetateni-din-state-terte-uniunii-europene/`
3. Page is primarily document-driven — lists methodology files, application forms, and PDF downloads with no structured guidance.
4. Scholarship information is on a separate page at `/burse-pentru-state-terte-uniunii-europene/` — not clearly linked from the main non-EU page.
5. Preparatory year information is on a further separate page at `/anul-pregatitor-de-limba-romana/` — not integrated into the main journey.
6. No step-by-step guidance exists — user must piece together the process from multiple disconnected pages.
7. Application process ends with a link to an external platform with no preparation guidance.

Current pain points

- Page is almost entirely document-driven — high cognitive load with no guided structure.
- Scholarship and preparatory year information are on separate, disconnected pages with no cross-linking.
- No checklist or sequential process exists to guide the user through admission.
- User is directed to an external application platform abruptly with no preparation or context.
- No clarity on which documents are required at which stage of the process.
- No deadline information presented in a clear, scannable format.

Proposed ideal path (redesign)

1. Homepage → clear “International Students” entry point with audience selector.
2. `/international-students/non-eu/` — overview page with full sequential process.
3. Step 1: Confirm citizenship status and select the correct admission path.
4. Step 2: Check eligibility requirements.
5. Step 3: Review scholarship options and deadlines.
6. Step 4: Gather required documents using a clear checklist.
7. Step 5: Complete the preparatory year pathway if applicable.
8. Step 6: Submit application through the external platform.
9. End: Application submitted with full understanding of next steps.

Missing steps / pages needed

- A structured admission checklist replacing the current document wall.
- Scholarship information integrated into the main non-EU journey, not on a separate disconnected page.
- Preparatory year information linked clearly within the non-EU journey.
- A deadlines panel showing key dates in a scannable format.
- A “Important Links and Documents” panel grouping all required files in one place.
- Clear guidance before the external application platform link explaining what to prepare.

User Flow 4: International Applicant — EU

Who they are

A student from a European Union member state applying for a full-degree programme at UVT.

Their goal

Find the correct admission procedure, understand what documents are required, and submit a successful application.

Entry point

Homepage → International Students → EU Citizens

Current path (what happens today)

1. Land on homepage — International Students section visible in navbar.
2. Navigate to `/cetateni-din-state-ale-uniunii-europene/`
3. Page contains basic procedure information and required forms as file downloads.
4. No sequential structure — user must read through a block of text to understand the process.
5. No cross-linking to related pages such as scholarships, preparatory year, or support contact.
6. Application process ends with a link to an external platform with no preparation guidance.

Current pain points

- Minimal process guidance — the page reads as a flat text block with no clear sequence.
- Required forms are file downloads with no explanation of when or how to use them.
- No cross-linking to related pages — user must navigate independently.
- No deadline or eligibility summary presented in a scannable format.
- No distinction made between EU applicants and Romanian citizens with foreign diplomas, who follow a different process.

Proposed ideal path (redesign)

1. Homepage → clear “International Students” entry point with audience selector.
2. `/international-students/eu/` — overview page with sequential process.
3. Step 1: Confirm EU citizenship status.
4. Step 2: Review eligibility and admission requirements.
5. Step 3: Gather required documents using a clear checklist.
6. Step 4: Submit application through the external platform.
7. End: Application submitted with full understanding of next steps.

Missing steps / pages needed

- A structured admission page replacing the current flat text block.
- A document checklist with explanations of when and how each form is used.
- A deadlines panel showing key dates in a scannable format.
- Clear cross-linking to related pages — scholarships, contact, support.

- A clear distinction between EU applicants and Romanian citizens with foreign diplomas.

User Flow 5: Applicant from Ukraine

Who they are

A student from Ukraine with studies completed in Ukraine, seeking admission to UVT under special legal recognition conditions.

Their goal

Understand whether they qualify for special admission conditions, confirm which documents are required for credential recognition, and submit a successful application.

Entry point

Homepage → International Students → Citizens from Ukraine

Current path (what happens today)

1. Land on homepage — International Students section visible in navbar.
2. Navigate to `/cetateni-din-ucraina-cu-studii-in-ucraina/`
3. Page contains specific admission information and linked files for Ukrainian students.
4. Limited integration with the rest of the site — no cross-linking to scholarships, preparatory year, or support.
5. No clear distinction between Ukrainian students who qualify for special conditions and those who follow the standard non-EU path.
6. Application process ends with file downloads and external links with no guided next step.

Current pain points

- Page exists in isolation — no connection to related pages or the broader international student journey.
- No clear eligibility check to help the user confirm they qualify for special admission conditions.
- No information on document recognition or equivalence procedures for Ukrainian qualifications.
- No guidance on what happens after the initial application — next steps are absent.
- File-heavy layout with high cognitive load and no structured checklist.

Proposed ideal path (redesign)

1. Homepage → International Students → audience selector includes Ukraine as a specific path.
2. `/international-students/ukraine/` — dedicated page with clear eligibility and process.
3. Step 1: Confirm eligibility for special admission conditions.
4. Step 2: Understand document recognition and equivalence requirements.
5. Step 3: Gather required documents using a clear checklist.
6. Step 4: Review scholarship and financial support options.
7. Step 5: Submit application.
8. End: Application submitted with clear understanding of next steps.

Missing steps / pages needed

- A clear eligibility check at the top of the page.
- A section on document recognition and credential equivalence for Ukrainian qualifications.
- A document checklist replacing the current file-heavy layout.
- Cross-linking to scholarship options, preparatory year, and contact support.
- A “next steps after application” section so the journey does not end abruptly.

User Flow 6: Refugee / Asylum Seeker**Who they are**

A person with refugee or asylum seeker status seeking to understand their admission options at UVT.

Their goal

Identify which admission path applies to their situation, understand what documents are needed, and successfully begin the application process.

Entry point

Homepage → International Students → Refugees and Asylum Seekers

Current path (what happens today)

1. Land on homepage — International Students section visible in navbar.
2. Navigate to `/refugiati-si-azilanti-politic/`
3. Page branches toward EU or non-EU admission flows — one of the few pages with clear cross-audience links.
4. However, the page remains document-first — heavy on files, light on structured guidance.
5. No workflow structure explaining what the user should do first, second, or third.
6. No dedicated support contact for this specific user group.

Current pain points

- Page is document-first rather than workflow-first — no sequential process exists.
- No dedicated support contact for refugees and asylum seekers.
- Branching to EU and non-EU paths exists but is not clearly explained or guided.
- High cognitive load for a user group that may already be in a vulnerable or stressful situation — plain language and accessible design are essential.
- No multilingual support or accessibility consideration for users whose first language may not be Romanian or English.

Proposed ideal path (redesign)

1. Homepage → International Students → Refugees and Asylum Seekers.
2. `/international-students/refugees/` — clear, empathetic page written in plain language.
3. Step 1: Identify your status — refugee or asylum seeker.
4. Step 2: Select the correct admission path — EU or non-EU equivalent.

5. Step 3: Review required documents using a clear, accessible checklist.
6. Step 4: Contact the dedicated support person before applying.
7. Step 5: Submit application.
8. End: Application submitted with dedicated support contact available throughout.

Missing steps / pages needed

- A clear status selector at the top — refugee vs asylum seeker — leading to the correct path.
- Plain language content replacing the current document-heavy layout.
- Multilingual support or at minimum a clear English version of the page.
- A dedicated support contact card prominently displayed for this user group.
- A document checklist tailored to each status type.
- Cross-linking to relevant EU and non-EU admission pages.
- WCAG-compliant design to ensure accessibility for users with varying technical ability.

1.3 Staff and Partners

User Flow 7: Academic Staff — Incoming or Outgoing

Who they are

A UVT academic or administrative staff member seeking teaching or training mobility opportunities abroad, or an incoming visiting academic looking for information about coming to UVT.

Their goal

Find current mobility calls, understand the application process, and locate required documents quickly.

Entry point

Homepage → Erasmus section → Staff Mobility

Current path (what happens today)

1. Land on homepage — Erasmus section visible in navbar.
2. Navigate to outgoing staff mobility page at `/programul-de-mobilitati-erasmus/erasmus-outgoing-mobil`
3. Page lists yearly training week offers archived from 2015–2016 through to 2023–2024 — no clear indication of which call is current.
4. Current calls are buried among years of archived content with no filter or date indicator.
5. No separation between teaching mobility and training mobility in the navigation.
6. Required documents and contact persons are difficult to locate quickly.

Current pain points

- Historical archives from 2015 onwards clutter the page — current calls are not clearly distinguished from outdated ones.
- No separation between teaching mobility and training mobility.
- Staff mobility is grouped inside the student-facing Erasmus section — difficult to find quickly.
- Required documents and contact persons are not presented in a clear, accessible format.

- No deadline dashboard or calendar showing current application windows.

Proposed ideal path (redesign)

1. Homepage → Erasmus section → clear “Staff Mobility” entry point.
2. /erasmus/outgoing-staff/ — dedicated page with current calls prominently displayed.
3. Step 1: Choose between teaching mobility and training mobility.
4. Step 2: View current open calls with deadlines displayed in a clear dashboard format.
5. Step 3: Review required documents.
6. Step 4: Contact the relevant coordinator.
7. Step 5: Submit application.
8. End: Application submitted with full understanding of the process.

Missing steps / pages needed

- A dedicated staff mobility page clearly separated from student mobility.
- A deadlines dashboard showing current application windows at a glance.
- Current calls displayed prominently — archived offers moved to a collapsible archive section.
- Clear separation between teaching mobility and training mobility.
- A contact card for the relevant coordinator displayed prominently.
- A document checklist for staff applications.

User Flow 8: International Partner Institution

Who they are

A representative of a partner university or international institution looking to establish or manage a collaboration with UVT.

Their goal

Understand the partnership process, find existing agreements, access the Visiting@UVT programme, and locate the correct contact person.

Entry point

Homepage → Partnerships

Current path (what happens today)

1. Land on homepage — Partnerships section visible in navbar.
2. Navigate to /acorduri-de-colaborare-cu-parteneri-internationali/ for collaboration agreements.
3. Navigate separately to /visitinguvt/ for the Visiting@UVT programme — links to faculty PDFs and procedure documents with no deeper HTML structure.
4. Navigate separately to /lector-internationali-la-uvt/ for international lecturers information.
5. No guided call-to-action structure across any of these pages — partner must navigate independently between disconnected pages.

6. No single entry point consolidating all partnership information.

Current pain points

- Partnership information is spread across multiple disconnected pages with no unified entry point.
- Visiting@UVT page links only to faculty PDFs — no structured HTML process page exists.
- No guided call-to-action structure — partner must determine the process independently.
- No clear contact point for new partnership enquiries.
- No information on the collaboration agreement process or what is required to establish a new partnership.

Proposed ideal path (redesign)

1. Homepage → clear “Partnerships” entry point.
2. /partnerships/ — unified landing page consolidating all partnership information.
3. Step 1: Understand what types of partnerships UVT offers.
4. Step 2: Browse existing agreements by country or faculty.
5. Step 3: Access the Visiting@UVT programme information as a structured HTML page.
6. Step 4: Locate the correct contact person for new partnership enquiries.
7. Step 5: Initiate the collaboration process.
8. End: Partner has all the information needed to begin or manage a collaboration.

Missing steps / pages needed

- A unified partnerships landing page consolidating agreements, Visiting@UVT, and international lecturers.
- Visiting@UVT as a structured HTML process page, not just a collection of faculty PDFs.
- A searchable or filterable list of existing collaboration agreements by country and faculty.
- A clear contact card for new partnership enquiries.
- A sequential guide to establishing a new collaboration agreement with UVT.

2. Navigation Model

Based on the user flows above, the following navigation structure is proposed for the redesigned ri.uvt.ro website. The goal is to reduce navigation depth, create clear audience entry points, and eliminate the confusion caused by the current inconsistent structure.

2.1 Main Menu Structure

The proposed top-level navigation contains seven items, each mapping directly to a main audience group or institutional section:

1. **About DRI** — institutional information, team, mission, regulations, reports.
2. **Erasmus+** — all Erasmus mobility programmes for students and staff.
3. **International Students** — all admission paths for incoming full-degree students.
4. **Scholarships & Exchanges** — external funding and exchange programmes (Fulbright, DAAD, AUF, etc.).
5. **Partnerships** — collaboration agreements, Visiting@UVT, international lecturers.
6. **News** — announcements, current calls, deadlines, and updates.
7. **Contact** — support contact, office details, and response guidance.

This replaces the current top-level structure which mixes Romanian and English labels, lacks a News section, and groups content inconsistently. The label “Scholarships & Exchanges” replaces the previous “Programmes” label, which was too vague for users to understand without prior knowledge of the site.

2.2 Submenu Grouping

Each top-level item expands into a clear submenu:

About DRI

- Team
- Mission
- Regulations and Methodologies
- Reports

Erasmus+

- Incoming Students
- Outgoing Students
- Incoming Staff
- Outgoing Staff
- Partner Countries
- Other Erasmus+ Projects

International Students

- Non-EU Citizens
- EU Citizens
- Citizens from Ukraine
- Refugees and Asylum Seekers
- Romanian Citizens with Foreign Diplomas
- Preparatory Year
- Free Movers

Scholarships & Exchanges

- Scholarships Agency (ACBS)
- Francophonie University Agency (AUF)
- Fulbright Commission
- DAAD
- Other Programmes

Partnerships

- Collaboration Agreements
- Visiting@UVT
- International Lecturers at UVT
- International Association Memberships

News

- Announcements
- Current Calls
- Mobility Stories

Contact

- Contact Form
- Office Details
- Support Guidance

2.3 Quick-Access Links

The following high-priority links should be immediately visible on the homepage without scrolling, serving as the main entry points for the most common user types:

- **Incoming Erasmus Students** — direct link to `/erasmus/incoming-students/`
- **Outgoing Erasmus Students** — direct link to `/erasmus/outgoing-students/`
- **International Applicants** — direct link to `/international-students/`
- **Staff Mobility** — direct link to `/erasmus/outgoing-staff/`

- **Contact Us** — direct link to `/contact/`

These should appear as clearly labelled audience cards or buttons on the homepage, allowing users to identify their path immediately without reading through the full navigation structure.

2.4 Footer Wayfinding

The footer should serve as a safety net for users who did not find what they needed through the main navigation. It should contain:

- **Quick links column** — About DRI, Erasmus+, International Students, Partnerships, News, Contact.
- **Support column** — Contact form link, office address, email address, phone number.
- **Legal column** — Privacy Policy, Accessibility Statement, Sitemap.
- **Social links** — official UVT and DRI social media channels.
- **Language switch** — Romanian / English toggle, visible and functional on every page, preserving the user's current page context when switched.

The current footer contains a broken contact link pointing to `/contacte-2/?lang=en` which returns 404, and a sitemap link pointing to `cbg.uvt.ro` instead of `ri.uvt.ro`. Both must be corrected before launch.

3. UX Improvements List

The following improvements are proposed based on the audit findings and the user flow analysis above. Each item identifies a specific problem, explains its impact on real users, and proposes a concrete fix for the redesign.

Issues are classified by priority: **Critical** — must be resolved before launch; **High** — significantly affects usability; **Medium** — improves quality and maintainability.

1. Global noindex, nofollow active on all public pages **Critical**

Where: Site-wide

Why it matters: Search engines cannot surface any content — users who search for UVT Erasmus or admission information will not find the site organically.

Suggested fix: Remove the global noindex setting for the production site and add proper meta descriptions, canonical URLs, and structured headings per page.

2. Duplicate Erasmus outgoing route trees **Critical**

Where: /erasmus-outgoing-studenti/ and /erasmus-outgoing-studenti-2/

Why it matters: Outgoing students cannot determine which branch is current or official, leading to confusion and potential reliance on outdated information.

Suggested fix: Keep one canonical route and redirect all legacy URLs to it permanently.

3. Broken links on high-traffic pages **Critical**

Where: Homepage, footer, Erasmus Policy Statement section

Why it matters: Three broken links were identified during the audit — on the homepage, footer, and Erasmus Policy Statement section. Users lose trust and abandon tasks when links return 404 or resource not found.

Suggested fix: Fix all identified broken links before launch and establish a regular link audit process.

4. No step-by-step journey structure for any user type **Critical**

Where: All audience pages

Why it matters: Users require a minimum of 5–7 clicks before reaching actionable information, with no sequential guidance connecting steps. This leads to confusion and drop-off across all user groups.

Suggested fix: Rebuild all audience pages around a clear sequential process with visible steps and next-step navigation at the bottom of each page.

5. Key information hidden inside accordion sections **High**

Where: Erasmus incoming and outgoing pages

Why it matters: Users have no overview of what is inside each section and no guidance on where to start. Content is invisible until interaction, which increases cognitive load.

Suggested fix: Replace accordions with visible process pages where content is scannable without requiring interaction.

6. Available places and documents provided as file downloads

High

Where: Outgoing students, international students pages

Why it matters: Files are hard to scan, cannot be filtered, and do not function well on mobile devices. Users cannot search or compare options without downloading multiple files.

Suggested fix: Convert repeatable content into structured HTML pages. File downloads should be available only as supplementary support, not as the primary content delivery method.

7. Contact provided only as mailto links

High

Where: Multiple pages across the site

Why it matters: Users on mobile devices may not have an email application configured. There is no guidance on what to include in a message or when to expect a reply.

Suggested fix: Add a contact form with subject guidance and a stated expected response time alongside the existing mailto link.

8. Partner institutions shown as map view

High

Where: Outgoing students page

Why it matters: Map view cannot be searched or filtered by country, faculty, or available places. Users who know their target country or institution have no efficient way to find it.

Suggested fix: Replace the map view with a structured, filterable HTML list of partner institutions searchable by country and faculty.

9. No accessibility considerations across the site

High

Where: Site-wide

Why it matters: The current site has no documented WCAG compliance. Users with visual, motor, or cognitive impairments may be unable to navigate or access content. This is particularly critical for vulnerable user groups such as refugees and asylum seekers.

Suggested fix: Implement WCAG 2.1 AA compliance across the redesign — including keyboard navigation support, sufficient colour contrast ratios, alt text for all images and documents, readable form labels, and accessible language throughout.

10. Weak internal cross-linking between related pages

High

Where: All audience pages

Why it matters: Users reach dead ends and must return to the navbar or homepage to continue their journey. This increases the number of steps required and raises the risk of drop-off.

Suggested fix: Add “Related pages” and “Next step” panels at the bottom of every audience page.

11. Historical staff training archives clutter current content**Medium**

Where: Outgoing staff mobility page

Why it matters: Current calls are buried among archived offers going back to 2015. Staff members cannot quickly identify which call is active without scrolling through years of outdated content.

Suggested fix: Display current calls prominently at the top of the page. Move archived offers to a collapsible or separate archive section.

12. No news or announcements system**Medium**

Where: Site-wide

Why it matters: Time-sensitive calls, deadlines, and updates cannot be managed or archived cleanly. There is currently no structured content type for announcements.

Suggested fix: Add a dedicated `/news/` section for announcements, current calls, and updates as a structured content type with date-based archiving.

13. Inconsistent URL naming conventions**Medium**

Where: Site-wide

Why it matters: Mixed Romanian and English URLs, inconsistent use of diacritics, and varying nesting depth make the site difficult to maintain, explain, and link to reliably.

Suggested fix: Adopt one consistent URL convention — lowercase, hyphenated, audience-first, one language per route tree — and apply it across all new pages.

14. Test and trashed pages publicly exposed**Medium**

Where: `/homepage-test-ana/`, `/test/`, trashed summer school routes

Why it matters: Publicly visible test and trashed pages make the site appear unmaintained and pollute the information architecture.

Suggested fix: Unpublish, archive, or redirect all test, example, and trashed routes before launch.

15. No language switch that preserves context**Medium**

Where: Site-wide

Why it matters: Switching language currently loses the user's position in the site, forcing them to navigate again from the beginning in the new language.

Suggested fix: Implement a language toggle that keeps the user on the equivalent page in the selected language, maintaining their navigation context.
