

ri.uvt.ro Final Sitemap Draft

Date: 2026-05-04

Scope: final Phase 2 sitemap proposal for the future `ri.uvt.ro` platform structure.

1. Sitemap goals

- organize the site around audience journeys instead of document piles
- reduce duplicate route branches and legacy URL confusion
- create a canonical structure that works for both WordPress and React
- support bilingual delivery without changing the underlying route logic

2. Top-level routes

- `/`
- `/about`
- `/erasmus`
- `/international-students`
- `/programmes`
- `/partnerships`
- `/calls`
- `/stories`
- `/news`
- `/resources`
- `/contact`
- `/search`
- `/sitemap`

3. Nested route groups

4. Priority landing pages

- /

- `/erasmus`
- `/erasmus/incoming-students`
- `/erasmus/outgoing-students`
- `/international-students`
- `/international-students/non-eu`
- `/international-students/eu`
- `/international-students/ukraine`
- `/programmes`
- `/partnerships/visiting-uvt`
- `/calls`
- `/resources`
- `/contact`

5. Logical content clusters

- Institutional cluster:
home, about, contact, regulations, reports
- Erasmus cluster:
incoming students, outgoing students, incoming staff, outgoing staff, partner countries, cooperation projects
- International admissions cluster:
non-EU, EU, Ukraine, refugees, preparatory year, free movers, Romanian diplomas abroad
- Opportunity cluster:
calls, programmes, scholarships, mobility offers
- Trust and proof cluster:
stories, reports, team, partner activity
- Resource cluster:
forms, methodologies, guides, downloadable files, academic calendars

6. Final route rules

- keep only one canonical Erasmus route tree
- redirect all current legacy Erasmus URLs to the new canonical branch
- use nested pages for evergreen guidance and audience journeys
- use flat archive routes for repeatable content such as calls, stories, news, and resources
- support locale-aware routing in React without changing the underlying content model

7. Final recommendation

This sitemap gives the platform a cleaner public structure, stronger landing pages, and a route hierarchy that is easier to maintain than the current live site. It also creates a stable base for the next implementation phase without preserving duplicate or low-value legacy branches.
