1. Project Overview

The mission is to transform ri.uvt.ro into a modern, accessible, structured institutional platform that better serves its audiences and supports long-term maintainability.

The redesign is not only about visuals. It is about improving navigation clarity, content governance, usability, technical sustainability, and trust.

The platform primarily serves:

- International students;
- Partner institutions;
- Academic staff;
- Incoming and outgoing mobility participants;
- Administrative stakeholders.

2. Strategic Objectives

1. Audit

Analyse the current structure, route logic, content quality, broken links, and usability barriers.

2. Architecture

Build a clear information hierarchy with audience-first navigation.

3. UI / UX

Create a responsive design aligned with UVT institutional identity.

4. Implementation

Build the platform through WordPress content management and a modern React frontend.

5. Optimization

Ensure multilingual readiness, accessibility compliance, SEO hygiene, and mobile performance.

3. Delivery Philosophy

Code-First Strategy:

Every team member contributes to real delivery. No role is purely theoretical.

This means:

- planners help shape implementable systems;

- designers understand frontend constraints;
- developers think about users;
- content contributors respect structure;
- QA begins early, not only at the end.

4. Team Roles and Execution Model

4.1 Role 1: Project Manager + Frontend Lead

Role 1: PM + Frontend Lead

🎯 **Responsibility:** Coordinate milestones, priorities, technical direction, and stakeholder communication.

- Improve multilingual clarity.

4.8 Role 8: QA + Accessibility

Role 8: QA + Accessibility

🎯 **Responsibility:** Protect quality, inclusiveness, and reliability.

💻 **Tech Contribution:**

- Review semantic structure;
- Improve contrast and accessibility;
- Fix layout bugs;
- Optimize performance and assets.

5. Operational Rules

Execution Rules

- No isolated theoretical roles.

- Reusable systems over one-off fixes.
- Backend and frontend remain synchronized.
- Clear Git workflow with branches and pull requests.
- Continuous QA during development.
- Institutional consistency over personal preference.

6. Expected Outcomes

By successful completion, the team should deliver:

1. Clear institutional navigation;
2. Modern responsive frontend;
3. Maintainable WordPress content system;
4. Improved accessibility and performance;
5. Better user journeys for all key audiences;
6. Scalable foundation for future expansion.
