

ri.uvt.ro Sitemap and Route Audit

Audit date: 2026-04-25

Scope: public Romanian site at `https://ri.uvt.ro/`, checked against the live homepage, public WordPress page index, and direct route/status checks.

Important context: this is not a web app with feature routes. It behaves like a WordPress information site made of public pages, downloadable files, and external platforms.

1. Current sitemap / site routes

Core public routes

Home

- `/`

Despre DRI

- `/echipa-dri/`
- `/misiune-dri/`
- `/regulamente-si-metodologii/`
- `/rapoarte-dri/`

Erasmus

- `/programul-de-mobilitati-erasmus/`
- `/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/`
- `/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/academic-calendar/`
- `/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/accommodation/`
- `/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/ects-info-packs-courses-at-wut/`

- [/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/erasmus-departmental-coordinators/](#)
- [/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/online-application/](#)
- [/programul-de-mobilitati-erasmus/erasmus-incoming-mobilitati-de-predare-si-formare/](#)
- [/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/](#)
- [/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/cum-aplic/](#)
- [/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/locuri-disponibile-erasmus-2021-2027/](#)
- [/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/am-fost-selectionat-ce-fac-acum/](#)
- [/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/formulare-ects/](#)
- [/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/despre-creditele-ects/](#)

- [/lectori-internationali-la-uvf/](#)
- [/afilieri-la-asociatii-internationale/](#)
- [/visitinguvf/](#)

Contact

- [/contact/](#)

Observed redirect aliases

These work, but they redirect to deeper canonical routes:

- [/erasmus-incoming-studenti/](#) -> [/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/](#)
- [/erasmus-incoming-mobilitati-de-predare-si-formare/](#) -> [/programul-de-mobilitati-erasmus/erasmus-incoming-mobilitati-de-predare-si-formare/](#)
- [/erasmus-outgoing-studenti-2/](#) -> [/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/](#)

- `/erasmus-outgoing-mobilitati-de-predare-si-formare/ -> /programul-de-mobilitati-erasmus/erasmus-outgoing-mobilitati-de-predare-si-formare/`

Other live but low-value routes found in the page index

- `/homepage-test-ana/`
- `/homepage-test-ana/test-bianca/`
- `/test/`
- `/test-2/`
- `/west-university-of-timisoara-late-summer-school__trashed/1st-edition-wut-summer-school/`
- `/west-university-of-timisoara-late-summer-school__trashed/2nd-edition-wut-summer-school/`
- `/west-university-of-timisoara-late-summer-school__trashed/3nd-edition-wut-summer-school/`
- `/west-university-of-timisoara-late-summer-school__trashed/4th-edition-wut-summer-school/`

Posts

There is no real public news or blog architecture. The public post index exposed only:

- `/salut-lume/`
- `/test/`

This means the site currently behaves as a page library, not as a structured content/news system.

2. How routes are linked to each other

Primary navigation model

- Global header / Navbar:
every page exposes the main top-level groups: Home, Despre DRI, Erasmus, Programe,

Studenti Internationali, Parteneriate, Contact.

- Homepage section cards / icon lists:
the homepage repeats most top-level destinations as content blocks, so `/` is the main route hub.
- Page body links:
many routes do not link to sibling pages; they mostly link to PDFs, DOCX, XLSX, or external application platforms.
- Footer:
offers contact, policy links, social links, and a broken English contact link.

Route relationship table

From route	You can access	Through which component	Notes
<code>/</code>	All top-level sections listed above	Navbar	Main site-wide hub
<code>/</code>	Most top-level landing pages and audience pages	Homepage section cards / icon lists	Repeats navigation in content area
<code>/programul-de-mobilitati-erasmus/</code>	Incoming students, outgoing students, incoming staff, outgoing staff	Body links on Erasmus overview page	Good hub, but quickly drops into documents
<code>/programul-de-mobilitati-erasmus/erasmus-incoming-studenti/</code>	English help pages, academic calendar PDF, info sheet PDF	Body links	Weak internal RO route hierarchy
<code>/programul-de-mobilitati-erasmus/erasmus-outgoing-studenti-2/</code>	<code>cum-aplic</code> , <code>locuri-disponibile</code> , <code>am-fost-selectionat</code> , BIP routes, old branch routes	Body links	Mixed old/new route trees
<code>/erasmus-outgoing-studenti/</code>	BIP pages, mobility stories, document downloads, query-string pages	Body links	Legacy branch still active
<code>/cetateni-din-state-terte-uniunii-europene/</code>	<code>anul-pregatitor-de-limba-romana/</code> , <code>povesti-internationale/</code> , many files	Body links	Audience route, but mostly a document bucket
<code>/burse-pentru-state-terte-uniunii-europene/</code>	<code>cetateni-din-state-terte-uniunii-europene/</code> , methodology files	Body links	Some cross-linking exists
<code>/refugiati-si-azilanti-politic/</code>	EU and non-EU admission pages	Body links	One of the few clear cross-audience links

From route	You can access	Through which component	Notes
<code>/visitinguvvt/</code>	Faculty PDFs and procedure documents	Body links	No deeper HTML route structure
Any page	<code>/contact/</code> , social links, policies	Footer	Shared footer navigation

Observed broken or weak links

- Homepage links to `/west-university-of-timisoara-late-summer-school/` , which returned `404` on 2026-04-25.
- Footer "Contact" link points to `/contacte-2/?lang=en` , which returned `404` on 2026-04-25.
- The footer "Sitemap" does not point to `ri.uvt.ro` ; it points to `cbg.uvt.ro/page-sitemap.xml` .
- Several outgoing Erasmus links still use `?page_id=` style URLs internally.

3. What is good

- The homepage exposes the main institutional domains clearly.
- The top-level groups align reasonably well with real audiences: DRI, Erasmus, international students, partnerships.
- The Erasmus section has a meaningful hub page instead of only flat links.
- Some audience pages already point to the next relevant step, especially non-EU scholarships and refugee pathways.
- Redirect aliases exist for some shorter Erasmus URLs, which helps preserve old links.

4. What is bad

- Site-wide `noindex, nofollow` is active on public pages. This is a major SEO and discoverability issue.
- Information architecture is split between HTML pages, PDFs, DOCX, XLSX, and external portals, so the site often behaves like a file repository rather than a website.

- There are duplicate Erasmus route trees: a nested canonical branch and a second live legacy branch.
- Several low-value pages are publicly exposed: test pages, an example page, empty-title pages, and `__trashed` summer-school routes.
- Broken links exist in important areas: the homepage and footer both contain routes that 404.
- URL naming is inconsistent:
mixed Romanian/English, mixed diacritics/no diacritics, mixed nesting depth, mixed naming conventions.
- The public post system is effectively unused, so there is no clean "news / announcements / calls" content model.
- Many user journeys end in file downloads instead of clear step-by-step HTML pages.
- Internal cross-linking is weak:
many pages do not connect to sibling routes and rely on the user to return to the homepage or navbar.

5. What could be better

Problem list with suggestions

Problem	Why it matters	Suggestion
Public pages are <code>noindex, nofollow</code>	Search engines will not surface the content well	Remove the global noindex setting for production
Duplicate route trees for Erasmus outgoing	Confuses users and editors, increases maintenance cost	Keep one canonical route tree and redirect all legacy pages to it
Broken links on high-traffic pages	Users lose trust and abandon tasks	Run a full link audit and fix broken homepage/footer links first
Public exposure of test/trashed pages	Looks unmaintained and pollutes IA	Unpublish, archive, or redirect all test/example/trashed routes
File-heavy content model	Hard to scan, translate, update, and navigate on mobile	Convert repeatable procedures into structured HTML pages with attached downloadable files only as support
Weak audience journeys	Users have to infer their next step	Rebuild IA around audience landing pages with explicit next actions

Problem	Why it matters	Suggestion
Weak content typing	Calls, stories, procedures, and yearly offers are mixed together	Introduce content types such as <code>guides</code> , <code>calls</code> , <code>stories</code> , <code>documents</code> , <code>programmes</code>
Inconsistent URLs	Harder to maintain and explain	Adopt one route convention: lowercase, hyphenated, audience-first, one language per tree
Little cross-linking between related routes	Dead ends increase friction	Add "Related pages" and "Next step" blocks on all audience pages
No real news structure	Announcements are hard to manage and archive	Add a proper <code>/news/</code> or <code>/announcements/</code> section for time-based content

6. Recommended future sitemap direction

This would be easier to use and maintain:

- `/`
- `/about/`
- `/about/team/`
- `/about/mission/`
- `/about/regulations/`
- `/about/reports/`
- `/erasmus/`
- `/erasmus/incoming-students/`
- `/erasmus/incoming-staff/`
- `/erasmus/outgoing-students/`
- `/erasmus/outgoing-staff/`
- `/erasmus/partner-countries/`
- `/international-students/`
- `/international-students/non-eu/`
- `/international-students/eu/`
- `/international-students/ukraine/`
- `/international-students/romanian-diplomas-abroad/`

- /international-students/preparatory-year/
- /international-students/free-movers/
- /international-students/refugees/
- /programmes/
- /partnerships/
- /visiting/
- /stories/
- /news/
- /contact/

This would let the new site separate:

- static pages: about, contact, policies
- dynamic collections: news, stories, yearly calls, opportunities
- reusable blocks: download lists, deadlines, eligibility, contact cards, next-step panels
